Network Systems Technician | San Diego, CA

PROFESSIONAL SUMMARY

IT support professional with hands-on experience in municipal government environments, specializing in network infrastructure, Active Directory administration, endpoint management, and Tier 1–2 technical support. Proven ability to manage enterprise software deployments, author SOPs, and support hybrid on-prem/cloud environments. Programming background adds practical depth in PowerShell scripting and automation.

PROFESSIONAL EXPERIENCE

IT Support Technician I July 2025 – Present
City of San Marcos IT Department — San Marcos, CA

- Provide front-line Tier 1–2 support for city staff across desktops, laptops, mobile devices, printers, and peripherals; resolve hardware, software, and authentication issues with clear communication and full customer ownership.
- Deploy and manage enterprise applications including Adobe, Bluebeam, and AutoCAD; coordinate federated license installs, renewals, and compliance tracking across departments.
- Perform Active Directory administration: create and manage user objects, security groups, and OUs; build and maintain standardized new-hire onboarding pipelines for consistent access provisioning and rapid day-one readiness.
- Assist with network infrastructure improvements including physical cabling, rack/switch organization, and foundational support for VLAN/subnet environments; troubleshoot WAN connectivity issues and escalate with documented evidence.
- Lead IT asset management and surplus operations: maintain inventory tracking, author SOPs for equipment intake, redeployment, disposal, and budget recoup processes.

IT Support Intern June 2024 – July 2025
City of Carlsbad IT Department — Carlsbad, CA

- Resolved Tier 1 hardware and software issues for city staff across Windows workstations and peripherals, following established service and escalation procedures.
- Deployed and patched endpoints using SCCM (System Center Configuration Manager), supporting system standardization, software currency, and security compliance across the organization.
- Maintained asset inventory and managed equipment lifecycle from procurement to surplus, ensuring accurate tracking and operational continuity.

APPLICATION DEVELOPMENT EXPERIENCE

Full Stack Engineer — BrewHop 2022
FastAPI, React, Yelp API, PostgreSQL

- Collaborated in a four-person team to build a web application for discovering and favoriting local breweries.
- Designed RESTful API endpoints using FastAPI backed by a SQL database; implemented CI/CD pipelines via GitLab and Render.com with unit testing.
- Built a clean, responsive GUI with location search, interactive maps, and user profile functionality.

TECHNICAL SKILLS

Technical Support	Tier 1–2 Remote & Onsite Support; Hardware, Software & Authentication Troubleshooting
Networking	Physical Cabling, Switch/Router Configuration, VLAN/Subnet Environments, WAN Troubleshooting
Systems Administration	On-Prem Active Directory (Users, Groups, OUs), Hybrid Azure AD (Entra ID), Microsoft Intune
Endpoint Management	SCCM, Application Deployment & Patching, Compliance Policies
Microsoft 365	M365 Admin Center, Exchange, Outlook, Teams, OneDrive Support
Security & Compliance	Microsoft Purview, Data Governance, Retention Policies, Network Security Monitoring
Scripting & Automation	PowerShell Scripting & Module Development
Documentation	KBA Authoring, SOP Creation, New-Hire Onboarding & Access Provisioning Workflows
Programming	Python, TypeScript, JavaScript, HTML/CSS; Git, Docker, CI/CD Pipelines

EDUCATION

MiraCosta College Oceanside, CA

- A.S. Computer Science — *Expected Fall 2026*
- A.S. Math and Sciences — December 2023

Software Engineering Immersive (Hack Reactor / Galvanize Inc.) Aug 2022 – Dec 2022
